DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mori, US Patent number 4,754,268, in view of Rathbone.

With regard to claim 16, Rathbone discloses a screen saver (page 167 paragraph 7), which will be revived if a signal from a mouse is received, but does not disclose the mouse is wireless, and only works if sent data matches corresponding data in the computer. Mori discloses a wireless mouse (column 1 lines 48-54) that sends a frequency that only operates computers with matching frequency (column 1 line 58-column 2 line 7). It would have been obvious to one of ordinary skill in the art to combine Mori's wireless mouse in Rathbone's description of Microsoft Windows 95, for Mori's stated motivation to make the mouse more convenient to use (column 1 lines 20-47).

With regard to claim 17, Mori discloses that a mouse controls a computer (column 2 line 66-column 3 line 4).

With regard to claim 18, Rathbone discloses that once out of screen saver, the user is prompted for a password (page 168 paragraph 3).

Response to Arguments

2. Applicant's arguments filed 08 March 2005 have been fully considered but they are not persuasive. Applicant submits that Mori's frequency does not read on the claimed security code, because any person can go to Mori's computer keyboard and merely touch the keyboard to wake the computer. This limitation of preventing a user from touching the keyboard to wake a computer is not claimed in claims 16-18.

3. Applicant states that a new dependant claim, 26, has been added, and that claims 23-29 are pending. No new claims were found.

Allowable Subject Matter

4. Claims 1, 7-12, 20 and 22 are allowed.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
